

CHILDREN'S COVID VACCINE ADVISORY GROUP

Urges Immediate Pause To Roll-Out to Children & Young People

FOLLOWING the decision to roll-out Covid vaccines to healthy children aged 5-11 from April, the Children's Covid Vaccine Advisory Group (CCVAG), comprising a wide range of senior health professionals, have issued a statement urging an immediate halt to the policy.

Dr Ros Jones, chairwoman of the CCVAG, said: 'Why are the governments of the four nations announcing a rollout of Covid vaccines to healthy children aged 5-11 when they still have not answered urgent questions about safety in 12-17-year-olds?'

More than 300 healthcare professionals have co-signed a letter to the government and its advisers, calling for an immediate halt to the the vaccine roll-out to children.

Hong Kong has ceased giving a second dose to children due to the increased Myocarditis risk confirmed after the second dose. New ONS data indicates at least 2 excess deaths per week of teenage boys, correlating with vaccine rollout.

Roll-out to children is all risk and no benefit. Children are at statistically 0% risk of dying from any respiratory infection including Coronavirus variants.

Up to 920 compensation applications have been filed by people who were left seriously injured after getting the **Covid-19** vaccine as claims could hit £110million.

The Vaccine Damage Payment Scheme (VDPS) allows people who are allegedly severely disabled due to a vaccination to claim a one-off tax-free payment of £120,000.

Family members of someone who has died after becoming disabled because of what they claim is the vaccination are also eligible to apply for the fixed payout.

It has emerged that the bill paid to those left with life-changing injuries from the Covid-19 vaccine or the families of those who died after getting the jab could top £110million, **The Times** reported.

It is believed that 920 compensation applications linked with Covid vaccination injury have already been filed under the VDPS, but no payments have been made yet.

The taxpayer has been forced to pay for these experimental vaccines, and now we are paying for deaths and injuries caused by them! Meanwhile protected corporations rake in liability-free profits.
