A truly amazing game. I blundered away the exchange but decided to give up my queen for two pieces instead and continued because his queenside was locked up and I thought I could get a bit of a kingside attack going. In the end he had to either lose his remaining rook which would leave me with rook, bishop and knight against queen, or give up his queen. He chose the latter which left him with a single bishop against my two. Although he lost on time, he abandoned the game because he was ahead on time after my last move. I felt great after this!
