

International False Rape Timeline - hangout (49) - Denial, Deceit, Delusion

The first thing I have to say is that when I was preparing these notes I noticed a recurrent problem, namely, in places the video slows down; towards the end the audio finishes before the video. I think I know the cause of this and hope to have it sorted for the next hangout. In the meantime, please bear with me.

I began with the backfile, explaining *inter alia* why I will not be adding Julian Assange to the Timeline. There were quite a lot of cases in the backfile, some of which have already been added. Not all the others will be, but Wilfred Wong almost certainly will be. Total nutter.

Coming to the main subject, this was a Zoom meeting by the misnamed Centre For Women's Justice. One of the speakers was murderess Sally Challen, who can be found on the Timeline.

I explained the third wave position on female crime/evil - namely it's always a man's fault, or men generally. Naz Shah seems to support that position, certainly as far as her murderous mother is concerned. I took a swipe at *Wikipedia* for perpetuating the lies of Zoorah Shah (or whoever came up with them). The imbeciles behind *Wikipedia* have actually deleted my corrections. I discussed the Zoorah Shah case here at length - an unusual woman indeed! Shah's tariff was reduced in 2000 to 12 years not 10 years as I said later.

I explained the scam Wistrich is using to overturn the murder convictions of women like Zoorah Shah - it didn't work in her case, but it did in Challen's case and also in the case of Emma Humphreys. There is a lengthy entry for Humphreys on the Timeline.

I discussed the Fariessia Martin case, she was convicted of murdering Kyle Farrell. Now it has been revealed that she was also a rape victim. Yeah, sure.

Another case, in which the killer isn't named, appears to be a drug addict who murdered her great uncle.

The notes to this publication include a citation from Jim Hopper and David Lisak. Lisak is on the Timeline; I made a video about his fellow mangina Hopper called *The JUNK SCIENCE Of JIM HOPPER*. I played part of the clip from Lisak which is on the Timeline, and trashed his absurd claims.
