Dear Tuppy,

RE: SFC

Please remove my telephone number from SFC leaflets, as weirdos have been phoning my office and causing trouble by leaving strange messages for me instead of waiting until I am available !. As an alternative you could operate the free legal advice service on porn by giving your number on leaflets, taking that of the caller and passing it onto me. I am not, however, prepared to continue having my number given out on leaflets, as some members of the public cannot be trusted to behave properly. I now work in a respectable office which will not tolerate that! The same applies to my home number, as I have a family. I am afraid that some of the people SFC attracts are nutters and I need a screening process, as neither the people I work with nor live with will tolerate such callers who think that they can say what they like even if I am not the person who has picked up the receiver !.

Yours sincerely,

Ted Goodman.
