

JEWISH ANTI-RACIST EXPOSES GAS CHAMBER FRAUD

DACHAU GASSINGS A TISSUE OF LIES

claims RUTH LEVIN

Director of the SEARCHLIGHT EDUCATIONAL TRUST

Zionist Hoaxers Exposed by Head of Britain's premier anti-racist organisation

IN view of the new campaign by Organised Jewry and its lapdogs to ban "Holocaust Denial", the publication of *When Hate Comes To Town* by the Searchlight Educational Trust, the educational arm of the Searchlight Organisation, is sure to cause uproar and controversy. *When Hate Comes To Town*, which is described as the Searchlight Community Handbook, has not only exposed the vicious racial hatred of groups such as Combat 18 but a major source of Zionist-inspired disinformation on the Holocaust. In 1963, the Board of Deputies of British Jews, Britain's most powerful Zionist organisation and one of the leading campaigners against Holocaust Revisionism, published a pamphlet in which it reproduced an American army photograph of what was purported in 1945 to be a Nazi gas chamber.

Yet three decades later, Ruth Levin, editor of *When Hate Comes To Town*, reports that "some historians have mistakenly stated that gas chambers were in operation at Dachau concentration camp..." On the back of this leaflet the reader will see an actual photocopy of this startling admission together with perjured testimony from the Nuremberg International Military Tribunal, and a staged photograph of the mythical Dachau gas chamber. This *gas chamber* was actually a delousing chamber which was used to fumigate prisoners' clothing with Zyklon B, a powerful cyanide-based insecticide. (Typhus was rampant in war-torn Europe and countless concentration camp inmates and SS personnel contracted, and often died from, this terrible disease).

Ruth Levin also slams the "Jews were made into soap" lie. On January 28, 1995, it was claimed in the *London Times* that the Nazis had manufactured soap out of "Jewish fat" which was scraped from the chimneys of the Auschwitz crematoria. The *Times* article reports that: "Yesterday, Andrzej Paluch, a sociology professor, explained why: the fat was made into blocks of soap and sold to Poles in the neighbouring town of Oswiecim." Professor Paluch is quoted thus: "It was known as RJF - Reines Jüdisches Fett - pure Jewish fat".

Not so says brave Ruth. Also reproduced here is a photocopy from page 1.4-4 of *When Hate Comes To Town*. It would seem that there is not a million miles between the testimony of gas chamber expert Fred Leuchter and the forthright opinions of brave Jewish anti-racist Ruth Levin. Even the six million figure is not sacrosanct for this courageous young woman: "Some reputable historians have concluded that perhaps the figure of six million murdered Jews is incorrect", she says. Oy vay! Is nothing sacred?

Levin's startling admissions further demolish the Zionist-sponsored lie that all Revisionists are Nazis, anti-Semites or just plain crazy. When spokespeople for Britain's premier anti-racist organisation start singing the tune of the Revisionists, the world had better sit up and listen.

This leaflet was written by Alexander Baron, who claims the right to be recognised as the sole author.

Top: No gassings in Dachau! Ruth Levin's startling admission from *When Hate Comes To Town*. Below: Fake photograph of Nazi gas chamber. Right: Levin endorses Leuchter's research. Bottom right: Perjured testimony from Volume 30 of the documents of the International Military Tribunal

Certainly there is room for honest academic enquiry about the Holocaust, as new findings and evidence come to light and historians reach different conclusions about certain aspects of the events that took place. For example, some historians have mistakenly stated that gas chambers were in operation at Dachau

concentration camp, and the belief that Jews were turned into soap is now thought to be erroneous. Some reputable historians have concluded that perhaps the figure of six million Jews murdered is incorrect; with some stating the true figure to be higher and others lower.

An American soldier examines the entrance to a Nazi camp gas chamber. It was "situated conveniently near to the crematorium."

Leuchter claims that if the gas chambers had existed, the sites would have contained chemical residues of the Zyklon-B gas used. According to Leuchter's research, no such residues were found, thereby providing conclusive proof that the Holocaust was a lie.

As in the case of other camps, local townspeople were brought in to view the dead at Dachau.

This is what the liberators found inside the buildings.

Hanging in orderly rows were the clothes of prisoners who had been suffocated in the lethal gas chamber. They had been persuaded to remove their clothing under the pretext of taking a shower for which towels and soap were provided.

This is the Brausebad—the showerbath.

Inside the showerbath—the gas vents.

On the ceiling—the dummy shower heads.

In the engineers' room—the intake and outlet pipes.

Push buttons to control inflow and outtake of gas. A hand-valve to regulate pressure.

Cyanide powder was used to generate the lethal smoke.

From the gas chamber, the bodies were removed to the crematory.
