

## *Stop The War Day Of Action To Stop The War*

Usually, leftist speak means something different, but this time what this particular group of leftists means is precisely what they say – **STOP THE WAR**

**That means everyone. In short:**

**Russian troops out.**

**NATO take a back seat.**

**And all that money being wasted on the war effort, spend it on something productive at home.**

Details of the day of action can be found on the Stop The War [website](#); they include at least seven events in Greater London. These are mostly afternoon events but a couple start late morning.

**There are now over five hundred videos on the Stop The War YouTube channel, including one uploaded in May about the West's [interactions with China](#). Their perspective on China is very different from the one given by the mainstream media. For one thing, the United States has a heavy military presence in the region, including the island of Guam and the Philippines, and guess where the missiles are pointed at?**
