If you haven't heard of Michael Chapman, take a gander at his [official website](#). The veteran singer-songwriter is currently playing dates in his native England, and as things stand he will be off to the States, New York, in October for a couple of gigs.

Chapman has a unique guitar style, and has produced a fair body of work since the release of his debut album *Rainmaker* in 1969. The 1970s was a particularly productive time for him as was the first decade of the new Millennium. Most fans will probably agree though that his outstanding album was his second, *Fully Qualified Survivor* released in 1970, which saw him borrow the late great Mick Ronson for the electric guitar parts, in particular the haunting soloing on *Stranger In The Room*. Currently, this and eight of his other compositions can be found on SongFacts.

His 2012 release *Pachyderm* raised a few eyebrows, but he is unlikely to be performing that or anything so wildly *experimental* on this tour. Check him out, **old guys with guitars** won't be touring forever.
