There are some people who are famous enough to be known only by their given names: Muhammad, Jesus, Madonna...There is another Madonna though, Country & Western star Madonna Nash, and yes, that is her real name. The singer-songwriter has been around for quite a while, she has a presence on both YouTube and Facebook, and a number of other websites.

In 2010, she set up her own record label with her husband Charles Fulp; two years later her song *Dirty Little Secret* appeared on the soundtrack of *Jodi Arias: Dirty Little Secret*

– a semi-documentary account of the murder of Travis Alexander by the temptress who is currently **America's most hated woman**.

Stunningly attractive, Madonna Nash has Country Music in her blood, as can be seen from her **official bio**; she plays acoustic guitar, and is currently performing with another artist as Nash And Fair at mostly small venues in her native North Carolina. Be sure to check her out on **Amazon**.
