The

Sex Maniacs
Ball

is promoting

Safer Sex

SEX is GREAT

It takes energy and imagination to change habits you like . . . even when you want to.

The reward can be discovering NEW DIMENSIONS of SEX and EXCITEMENT.

It may not be easy to change, but it is worthwhile:

DO adopt the simple guide-lines suggested here.

COR! I WOULDN'T MIND NEGOTIATING SAFER SEX WITH HIM!

With the "AIDS VIRUS" around (also known as HTLV III) it's now even more important than ever not to give or get more than you expected.

Anyone - Male or Female - can get or give the virus anytime in life and could have it a long time without realising.

The Virus can be passed if blood or other body fluids (like cum or piss) get into the body when fucking, or through the mouth, eyes or cuts in the skin.

Injecting drug users who share works are also at risk.

Apart from that, the virus is not passed on easily — despite the Public Panic.

DON'T TAKE THIS PERSONALLY; I NEVER KISS ON THE FIRST DATE

Since there's NO CURE yet for AIDS consider adopting the following recommendations . . .

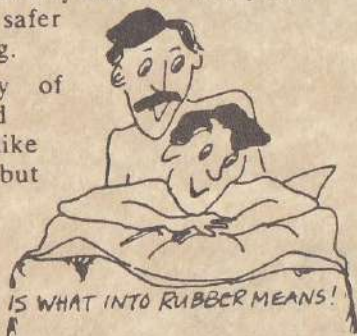

FUCKING IS very risky because you can get or give the virus through tiny tears in the skin or body tissue.

Really Want To Fuck ?

Use Rubbers (Condoms) - they aren't 100% safe as they can tear or slip off: but they're safer than nothing.

Use plenty of water-based lubricant like KY or 121, but get the rubber on first.

SO THIS IS WHAT INTO RUBBER MEANS!

Rubbers might take a bit of getting used to:

Try Wanking with them, it helps.
Try putting it on him.
You'll soon get the hang of it!

IMPORTANT when using Rubbers:

DON'T use Vaseline or oils - they melt the rubber in minutes. Use KY or 121: both water-based lubricants.

DON'T use Spit.

NEVER reuse rubbers. Use a NEW Rubber every time you fuck.

THAT'S WHAT WE DO WITH THEM?

THE TERRENCE HIGGINS TRUST

provides practical support, help, counselling and advice for anyone with, or concerned about Acquired Immune Deficiency Syndrome — AIDS or HTLV III infection.

FISTING always creates internal tears, so it's riskier still if there are cuts on the hands or if you fuck after fisting. (Remember: the virus can pass either way).

WATERSPORTS

are O K if piss doesn't enter your body, but, be careful of broken skin, the mouth and eyes too.

KISSING

is fine too: but if you've cuts or sores in your mouth or gums - it's not a good idea.

SUCKING is O K: but cum or pre-cum in the mouth is risky if there are cuts or sores on your cock or gums.

TOYS and DILDOS

can be a real turn-on but: DON'T share them. Have one each!

SEX is SAFEST

when there's no chance of the Virus getting into the body and the blood stream.

SEX is RISKY if it can.

YES, BUT IS IT CLEAN?

DRINK and DRUGS can make you feel good but they can affect your judgement.

POPPERS can be fun, but many people believe they may be harmful long term. Until we know more it might be wiser not to sniff them.

TALKING FANTASIES

can really get people HOT!

PORN and VIDEOS

can get you hard.

OF COURSE I'M SURE THIS IS SAFE!

Everyone's turned on by different things...

As For **WANKING**..

GO FOR IT!

Share the pleasure with a friend.

If you're worried give us a call on:

REDUCING THE RISK

All sexually active women, particularly partners of people in high risk groups, should know about safer sex. So, too, should women who are unsure of the sexual background of their partners. Many men who appear to be heterosexual may have had homosexual relationships in the past, so if in doubt – practice safer sex.

For sexual transmission to occur, body fluids containing HIV (especially blood or semen) must enter the partner's body through the vagina, rectum, mouth or breaks in the skin (e.g. cuts, grazes, ulcers, etc.). A condom should be used as a barrier in heterosexual lovemaking, for both vaginal and anal sex.

Do not rely on this as a method of birth control, but use some other form of contraception to avoid pregnancy.

Any sexual activity not involving penetration or exchange of body fluids is of low or no risk, assuming that the uninfected partner does not have any open cuts, grazes, sores, etc.

Any sexual practice which breaks the skin and mucosal surfaces will increase the risk, and for this reason anal intercourse is particularly dangerous as the rectum is easily damaged during sex.

Blood and semen are the main hazards, but all body fluids and products (e.g. urine, faeces) *may* contain an element of risk if they are exchanged frequently. Kissing is safe unless saliva contains blood (from bleeding gums or mouth ulcers). The risk is low unless the fluid contains blood.

Although woman to woman sex carries no observed risk at all, lesbians should be aware of safer sex, particularly if their partner uses injectable drugs, or is a bisexual woman in a relationship with a man in a high risk group, or was until recently in a heterosexual relationship with a man at risk.

Safer sex for women having relationships with men or women at risk

High Risk

Vaginal intercourse *without* using a condom.

Anal intercourse. (Using a *strong* condom and plenty of water-based lubricant reduces the risk.)

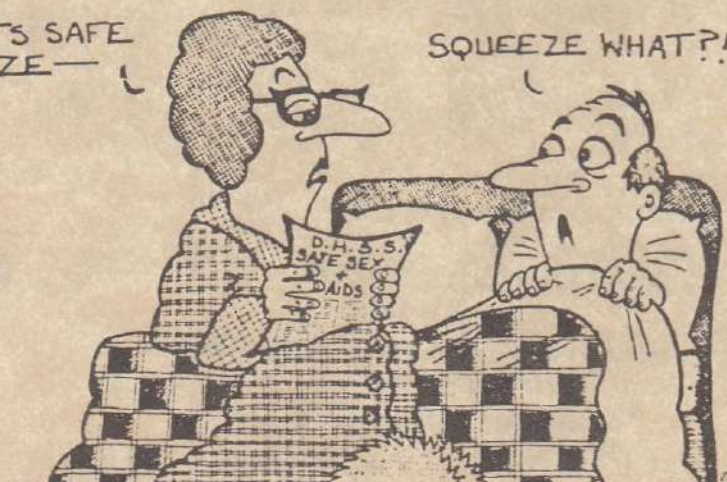

Any act which draws blood.

Any sexual practice which involves contact with urine or faeces.

Sharing sex toys (e.g. vibrators).

Sex during menstrual periods if partner has open cuts, grazes or sores on their hands or body.

THEY SAY IT'S SAFE
TO SQUEEZE —

- what all women need to know

Medium Risk

Oral sex by woman to man, even if he withdraws before orgasm.

Oral sex by woman to woman if active partner has bleeding gums, mouth ulcers, etc.

Oral sex by man to woman if he has broken skin in or around mouth.

Vaginal intercourse with condom.

No Risk

Stimulation using hands, either mutually or solo.

General body contact, stroking, body kissing.

Orgasm of semen *onto* partners body.

Sex toys - providing they are not shared.

REDUCING THE RISK IN OTHER WAYS

Women Planning Donor Insemination

If you decide to have artificial insemination, screening of the potential donor should include a detailed medical, social and sexual history. Priority should be given to donors who have been in a monogamous relationship since before 1980. Even donors who have been tested negative (if they belong to a high risk group) may not be acceptable. If your chosen donor does not want to have a test for HIV antibodies, it is better to find someone else who will agree to the test.

Donors who use injectable drugs may be in poor health regardless of exposure to the AIDS virus, and should be avoided.

The main agencies who specialise in artificial insemination are now screening donors, but if you decide to consult a private doctor make sure they are also following this practice.

Women Who Use Injectable Drugs

Do not share needles, syringes or other equipment since this carries a very high risk of passing on the virus. It is also wise to follow the safer sex guidelines, particularly if your partner is injecting drugs and shares his/her works.

Women Planning Pregnancy

If you or your partner are in a high risk group, or if either of you have been diagnosed as having HIV, then it is best to avoid becoming pregnant. Likewise, if either of you are in a high risk group, and decide not to take the HIV test, then you should consider avoiding pregnancy. If you do become pregnant you might want to consider having an abortion as pregnancy increases the chances of an infected woman developing AIDS. Babies born to mothers with HIV are often infected too, and have a high chance of getting full AIDS.

This spectacular ball is in aid of a socially revolutionary organisation -

The OUTSIDERS Club

The **Outsiders Club** helps people directly — people who feel shunned socially and sexually. Many of these people have physical disabilities. The charity which supports its aims, the **Integration Trust**, promotes integration and combats ignorance on sex and disability.

We all KNOW people who get shunned but no-one before has had the guts to do anything to help them. Everyone has a distant relative who was born spastic or deformed, and a neighbour who's a strange shape or disfigured and we've watched them live in emotional isolation. Not only that, most of us have OURSELVES been through phases in our lives when we've felt unattractive, and if not, we certainly WILL.

Tuppy Owens had the guts to DO something. Since 1979 she has financed and run the Outsiders Club which now has over a thousand members. She's received little or no support from anyone else. Now is the chance for that support to be given, by all the enthusiasts at this ball.

To give you an idea of the way in which the **Outsiders Club** helps people in a dramatically effective way, we are publishing here a sample of letters which have arrived at its offices in the last few weeks.

Dear Tubby,

It was very kind of you and your friends at the Outsiders office to send me a birthday card. I was very moved. It was the only one I had. Nothing happened. My mum gave me a present. Tubby, I have made 2 contacts from the Outsiders: 1. A lady, Rose, from Chalfont St. Giles. I write quite often. She seems very nice and 2. A man from Welwyn Garden City. I don't mind, Tubby, if you spread my name around. I still feel very lonely. I still have no friends I can see or go out with. I felt better since I joined the Outsiders. I will write to anybody, gay or not. Did you get my articles I sent you for the Club magazine?

I worry about being left on my own once mum goes. I'd like to have somebody I can turn to. I'll drop up to London one day, but I'll only have 4 hours, then back to Cornwall. Anybody planning a holiday in Cornwall? They can stay in a nearby B & B. I will be sending you a little something for your office. I don't seem to have received a new list of members for months. Is anything wrong?

Convey my thanks to your staff
Best Wishes, Giles.

Giles is a 38 year old man who is deaf and was so depressed when he joined our club that he used to weep, and was also embarrassed about his homosexual fantasies. We published one of these fantasies in our

magazine, **Inside**, and we hope that he is gaining confidence. Like many deaf people, his command of language is limited, hence Tuppy is called Tubby!

Dear Tuppy,

Thank you for your kindly letter & list of members, received today. Yes, I will guard the list with my life, every one has to trust deeply when offering details of themselves.

I am amazed how many young people are on your list, but only because the young appear to have much more access to meeting others than us older ones. It would seem the 'right' person can be elusive, even for them.

I feel less alone with my problems now I read of like persons. I know I must seem rather pathetic, as I am being besieged with problems at present and, am very tense, being always unable to cope and feeling guilty that I can't. Fortunately, I now have cars going to my mother's home each day, and how I bless them!

Please can you forward on the enclosed letters I have written to other members. To answer your question - yes I was divorced (so reluctantly) in 1973, but my husband left us for an older woman in 1968. It is a long time for a person of loving temperament to be in this position, you will no doubt agree.

I asked my doctor to refer me to some one qualified who could spare time to listen to me - ie my childhood, my long-ups, fears etc, so I could be helped to help myself (which is the key, of course) to come to terms with life and to cope. But he said "your life will only change when your circumstances change" (meaning my panics on long journeys, and my mother.) I wish to cope now. I think I need a counsellor, but I cannot afford my doctor & seek private official help, because I have very little money due to circumstances. That's why it's such a relief to have found the Outsiders.

Thank you for the literature, you are doing a good job and I enclose an SAE for future use.

Sincerely
Peggy.

Peggy is a 61 year old lady who suffers agoraphobia and thinks her face is too irregular. Like many divorced women, she hates going to social events by herself, and her children have now left home, so she's all alone.

Dear Tuppy,
 Just to let you know
 that, thanks to the
 Club, Donald Bailey and
 I are engaged to be
 married and I
 shall not be
 corresponding any
 longer.
 Thank you for all
 you have done
 for me in the past.
 Yours with love
 Janet Fairclough.

The Outsiders Club
 P.O. Box 42B
 London W1A 42B

cartes publistar 133 boulevard de Charonne Paris 11
 tel. 100 99 4 700 3134

Donald is a 31 year old man who needs a wheelchair to get around because his multiple sclerosis makes him unsteady. He also has epilepsy. He lives up in Manchester. Janet is a 42 year old lady who suffers mild MS, living in SW London. We don't know where they plan to live.

Dear Tuppy,

On August 8th I gave
 birth to a beautiful baby girl Claire
 Louise and we are over the moon. We will
 try to bring her along to an Outsiders
 Lunch party but not until October I think.
 Bring your camera so you can photograph
 all three of us.

Love

Pam & Reg.

Pam was born in 1944, the youngest in a large family. When her mother discovered she was partially sighted, she made Pam stay at home and do simple chores whilst the other children went out to play. They got married but Pam went to work in a sheltered workshop. Eventually, Pam got her own flat and started working in a bedding factory. At 38, she felt on the shelf but she had no idea how to improve her chances of finding a husband. One man who came into her life realised how unhappy she was and introduced her to the Outsiders Club. She came along to Club lunches but was panicky and sobbed in the arms of those of us who run the club. Slowly she gained confidence and at the Christmas lunch of 1984, she was introduced to Reg. She immediately complained he was much too young for her but Reg took her out and they became best friends. Reg had been brought up by his

grandmother and was extremely bashful. Reg and Pam got married in July 1985 and now they are confident parents. Those of us who remember them when they first came along, are both amazed and delighted at the transformation.

Pam, Reg and Claire Louise

The **Outsiders Club** helps people climb out of their own pit of isolation and helplessness. It brings people a chance to think better of themselves and find partners who will accept them, whatever their handicap or inadequacy.

It's run unlike any other charity — not with staff and a hierarchy, but as a self help group, run by and for the members. This has been great on a social level but brought all kinds of administrative holdups and inadequacies. The object of this ball is to finance someone who will keep the membership lists accurately up-to-date and make sure that all members receive a regular contact list. This will leave the volunteer members free to carry out the work they are good at: encouraging new members to meet each other and offering friendly supportive chats.

Our goal is £10,000 to pay for a membership secretary for one year. We will only reach that figure if YOU give from YOUR pocket, and give GENEROUSLY: the cost of your ticket has only paid to give you a good time. There are 400 people at this ball, so that means £25 each. Thank you.

This page was paid for anonymously by a distributor & publisher of erotic books who faces trial and a probable long prison sentence in our "free" Wes tern World.

EXPERTS AGREE THAT CENSORSHIP WORKS

The experts have always agreed that censorship is the one best weapon with which to promote their own single-minded ideas. Censorship worked in Nazi Germany and works today in Iran, the Soviet Union and South Africa.

Censorship also works in the UK, although its implementation is more subtle and in some areas less severe. Even so, a few so-called "decency groups" are trying to extend its application and effectiveness here. These people believe that if you aren't allowed to watch "dangerous" television programmes like

"Eastenders", "Sebastiane" or "AIDS — Everybody's problem" or read "immoral" publications like Forum or Sunday Sport, our country will be a better place.

Fortunately, you don't have to trust your freedom of choice to the "experts" — yet!

Say NO to censorship whilst you still have the freedom to do so.

Say it NOW — tomorrow may be too late.

Freedom is everybody's business.
