THE MAN IN THE MIRROR

This documentary will provide a unique portrayal of a young African man, Suraj Odekunle, who was once a victimised youth. He will be sharing how he overcame adversity to become a leader within the community, by consciously taking responsibility for his past, present and future. This documentary will supply young people with a visual presentation of how they can “strive to be the best they can be” with positive thoughts and actions. Letting them know that it is never too late to turn a negative into a positive no matter the circumstances or situation.
